

HELP!!

Jack Russell Mix with Diabetes needs a new home!!

- 6 year old male
- Neutered
- UTD on all shots
- 13 pounds
- Healthy
- Affectionate
- Active

His diabetes is well managed with two tiny shots a day (he takes them very well). He loves to snuggle on your lap or soak up the sun. He enjoys walks or just spending time with you. He went swimming for the first time this summer, too!

His owner is entering paramedic school and can no longer give him the time and quality of life he deserves. If we can't find a home for him, he will have to be humanely put to sleep as rescues won't take an "owner-surrendered" dog and we have exhausted our other options.

If you have any suggestions or know of an older person or single gal who could use a new companion, please call or email us!

Thank you!!
